IBM Manuals -Mainframe JCL CICS DB2 Manuals COBOL Manuals Job control language (JCL) is a set of statements that you code to tell the z/OS ® operating system about the work you want it to perform. Although this set of statements is quite large, most jobs can be run using a very small subset. Learn about essential and most frequently used JCL statements and parameters, as well as coding ...

Ibm Z Os Jcl Manual  
Modify, print, or link modules for use with the IBM 3800 Printing Subsystem and IBM 4248 printer modules and stores them in a library. With this utility, many different forms or logos could be stored as images, and printed when needed, all using the same standard blank paper, thus eliminating the need to stock many preprinted forms, and the need for operators to stop the printer and change paper.

Reusable JCL collection Job control language (JCL) is a set of statements that you code to tell the z/OS ® operating system about the work you want it to perform. Although this set of statements is quite large, most jobs can be run using a very small subset.

JCL: Job Control Language for z/OS - Mainframes.com  
Discussion Job Control Language (JCL) is the command language of Multiple Virtual Storage (MVS), which is the commonly used Operating System in the IBM Mainframe computers. JCL identifies the program to be executed, the inputs that are required and location of the input/output and informs the Operating System through Job control Statements.
