Chapter 1, Organic Compounds, introduces the historical concept of organic compounds as those compounds produced by living things. Students then learn that the current concept of organic chemistry is the study of carbon compounds. Each section of the chapter addresses a different group of organic compounds, related by structure.

TEACHER'S RESOURCE - Nelson

Section 6.5: Rate Law. Tutorial 1 Practice, page 380 1. (a) The order of reaction with respect to A is 2. When the initial concentration of A is doubled, the rate increases by a factor of 4, or 2², so, the exponent of the concentration of reactant A is 2. The order of reaction with respect to B is 1. When the initial concentration of B is doubled, the rate is doubled, or multiplied by 2¹, so the exponent of the concentration of reactant B is 1.
