Nearly all of our behaviors are influenced by prior learning experiences in some way. This book describes some of the most important principles, theories, controversies, and experiments that pertain to learning and behavior that are applicable to many different species and many different learning situations. Many real-world examples and analogies make the concepts and theories more concrete and relevant to the students. In addition, most of the chapters include sections that describe how the theories and principles have been used in the applied field of behavior modification. Each chapter in the seventh edition was updated with new studies and new references that reflect recent developments in the field. The book includes a number of learning aids for students, including a list of

The English writer Charles Dickens said that man is an animal of habit many other writers and philosophers have said something similar, and in the same way that we usually act mechanically in our daily lives, our brain works in a similar way. Man is an animal of customs, and those customs together with his habits of life create in him, in a historical way, some alterations, or in the worst of cases, mental illnesses, which we are going to deal with in this book. This book deals in a detailed way the History of Psychology and Psychiatry, and also contains 3 dictionaries, one of Psychology, another of Psychiatry and another of phobias, fears, manias and mental illnesses of all kinds.
