Colouring books, paints, pencils, felt-tip pens, paper and modelling materials are found in the toolbox of most child and adolescent therapists, and can all help hold young people ' s attention.

Working with Children and Young People • Counselling Tutor

References made to ' child ' and ' children ' refer to children and young people under the age of 18 years. However, the principles of the document apply to professional behaviours towards all pupils, including those over the age of 18 years. ' Child ' should therefore be read to mean any pupil at the education establishment.

Working with Children and Young People • Counselling Tutor

Written from a unique interprofessional perspective, this book is an essential introduction to working with children, young people and families. It covers policy, practice and theory, exploring key themes and developments, including: - poverty and disadvantage - ethical practice - child development - education - child protection - children and young people's rights - doing research. The book introducess students to a range of theoretical perspectives, links the key themes to the existing and emerging policy and practice context and supports students in engaging with and evaluating the central debates. With case studies, reflective questions and sources of further reading, this is an ideal text for students taking courses in childhood studies, working with children, young people and families, interprofessional children's services, early years, youth work and social work.

Bridging the gap between learning and the application of knowledge and skills in Early Years settings, this book addresses the nuanced complexities and challenges which students may face as they progress into professional practice. Built around the experiences of undergraduate students, solution-focussed chapters tackle contemporary issues such as safeguarding, new materialism, reflective practice, and working with refugee children, linking these to theoretical and philosophical models and drawing on undergraduate and practitioner insights. Providing contextualized examples, insight into key issues, and application of theory to practice, this book offers incisive solutions to support the undergraduate journey into a career, with chapters covering topics such as: Best practice as a practitioner creating a caring environment Reflecting on practice to cultivate professional development Working with and for marginalised children Reflective practice Working with Children, Families and Young People is perfect for undergraduate students on Early Years and Childhood Studies courses, as well as other courses pertaining to working with children and young families, social work, and young communities.

Rev. ed. of: Communicating with children and infants. 2nd ed. 1997.

Working with Children and Youth with Complex Needs provides a detailed description of techniques and rich stories of how social workers, psychologists, counselors, and child and youth care workers can help young people become more resilient. With ample case studies and fascinating explanations of research, Dr. Ungar shows why we need to work just as hard changing the environments that surround children as we do changing children themselves. Building on lessons learned from clinical, community and residential settings, Dr. Ungar discusses 20 skills that can enhance the effectiveness of frontline mental health services. Along with descriptions of the skills necessary to talk with clients about the factors that put their mental health at risk, Working with Children and Youth with Complex Needs also presents systemic practices clinicians can use in their everyday work. Engaging with children ' s extended family, addressing issues of community violence, racism and homophobia, and helping parents and teachers understand children ' s maladaptive coping strategies as sometimes necessary are among the many practical strategies that are discussed which clinicians can use to enhance and sustain the therapeutic value of their work.

This interdisciplinary core textbook looks at learning and development from birth to 19 years, and provides an accessible introduction to the common areas of study across the many roles supporting learning and development. There is coverage of common themes and issues, and theory is closely integrated with practice throughout. Chapters cover: physical development, cognitive development, social and emotional development, professionalism, leadership, quality and effectiveness, working with families, safeguarding and promoting well-being, transitions, and equality and inclusion. Reflection points, workplace activities and professional development planners are all included, and these challenge readers and students to critically engage with theory in their own practice.

A unique companion to professional play practice! All play professionals are united in their belief that play is important for children ' s development — and there are inherent characteristics of play that underpin professional play practice across contexts. Providing an overarching concept of play, drawing together the evidence base across disciplines and linking theory to practice, The Essence of Play is the ideal handbook for all those working with children. Play acts as a natural resource for children to meet physical, intellectual and emotional challenges and this book, unusually, considers play from the perspectives of children rather than adults. It provides a baseline of shared knowledge for all play professionals, exploring the fundamental value of play rather than a ' how to ' approach to practice. It considers: the therapeutic potential inherent in play; how play reflects and promotes physical, emotional, intellectual, linguistic and social abilities; the emergence of different types of play skills and why these are important; cross-cultural patterns in play, gender, atypicality and adversity, highlighting the relevance of these issues to professional play practice; the benefits of utilising play for assessment and other professional practice issues such as ethical play practice, balancing risk with health and safety and the creation and management of boundaries. This text is designed for students and practitioners working with children across the helping professions, including early years education, play therapy, playwork, childcare, social care, nursing and allied health. Each chapter provides directed reading and small reflective tasks to encourage readers to digest key issues.

The potential for early intervention to prevent social problems later in life has become the focus of much debate in recent years and finds itself at the centre of contemporary social policy. The meaning of ' vulnerability ' — one of the key concepts in this drive — is examined in this book, as well as the relationship between vulnerability and the individual, communities and society. This book introduces students to a broad debate around what constitutes vulnerability and related concepts such as risk and resilience, and examines how vulnerability has been conceptualised by policy makers with a clear focus on early intervention. Adopting a case study approach, it opens with chapters examining the concept of vulnerability from sociological, psychological and social policy perspectives before looking at examples around disability, homelessness, leaving care, victims of violence, sexual abuse, prison, the Internet and drug use. Supporting students in engaging with and evaluating the conceptualisation and application of vulnerability in professional practice, this book is suitable for anyone either preparing for or currently working within the children ' s workforce, from social work and health care to education and youth work.

With case studies, interactive activities, summaries and guidance throughout, this book looks at the changing context of children and young people ' s services heralded by the structural, organizational and funding changes put forward in Eileen Munro ' s Review of Child Protection. It is strongly grounded in research and theory, and gives specific consideration to how systems theory can help practitioners in understanding families. It highlights the need for every social work practitioner to develop the capacity to undertake unified assessments and interventions in a wide variety of settings with individuals, families, and groups where there are child protection and safeguarding concerns.

This user-friendly book presents research-based best practices for serving families of children with special needs from birth to age 6. Expert contributors demonstrate how early intervention and early childhood special education can effectively address a wide range of family concerns, which in turn optimizes children's development and learning. Tightly edited, the volume offers indispensable tools for assessing families; identifying and capitalizing on their strengths; providing information, support, and coaching; collaborating with parents and teachers to address children's functional needs in the context of everyday routines; and coordinating care. Over a dozen reproducible checklists and forms help professionals immediately implement the techniques and strategies described.
